

What one street does at 3 AM: ovens, bins and a fox

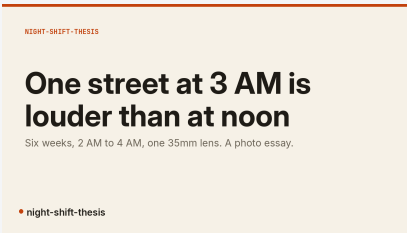

CORE MESSAGE

An 'empty' street at 3 AM is busy; it is just working for somebody else: the bakers, the bin crew and a fox.

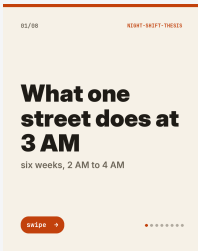

In this kit

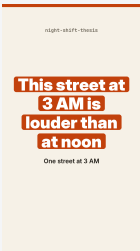

LinkedIn
For six weeks I photographed one street between 2 AM and 4 AM.

NIGHT-SHIFT-THESIS

One street at 3 AM is louder than at noon

Six weeks, 2 AM to 4 AM, one 35mm lens. A photo essay.

• night-shift-thesis

POST

For six weeks I photographed one street between 2 AM and 4 AM.

Same 400 metres of Kettle Lane every night. One camera, one 35mm lens, no flash, no tripod. If the street was too dark, the frame was too dark.

I expected silence. I got a schedule.

At about 3:10 the bakery on the corner switches on its ovens.

At 3:40 the bins go out, and for eleven minutes the street is louder than it is at lunchtime.

Near number 27, a fox crossed on 31 of the 42 nights I logged.

In the same six weeks, 9 people walked the full length of the street.

That became the argument of my thesis: an empty street is never empty. It is working for somebody else. The bakers, the bin crew, the fox.

The 48 frames that made the edit will hang at the graduate show in June.

What does your street do while you sleep?

#Photography #StreetPhotography #Thesis

FIRST COMMENT

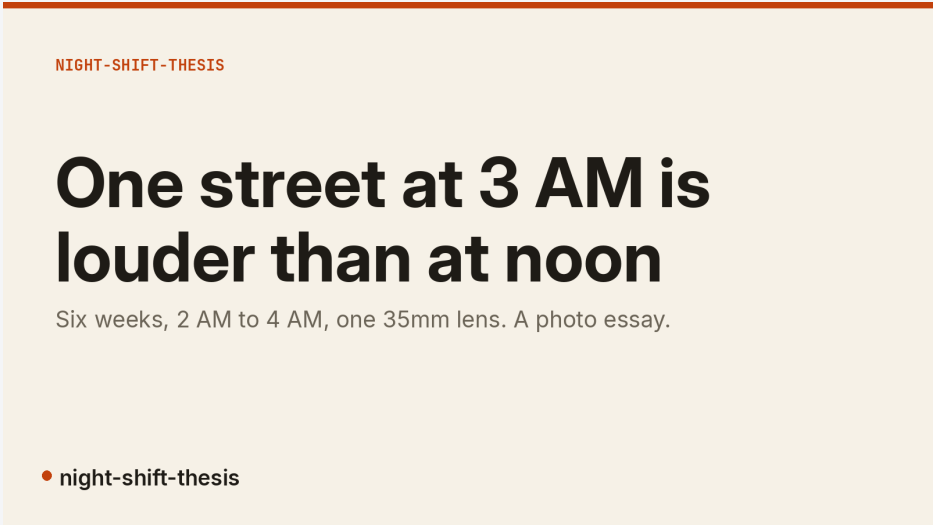

Method, the frame index and both written chapters are in the project README. 48 frames, picked from 2,100 exposures.

CAPTION

I spent six weeks on one street between 2 AM and 4 AM, expecting silence.

Instead I found a timetable. Ovens at 3:10. Bins at 3:40. A fox near number 27 most nights. Nine people in six weeks.

This is my BFA thesis, Night Shift: 48 frames, one 35mm lens, no flash. If the street was too dark, the frame was too dark.

Graduate show in June. Full project: link in bio.

Portfolio case study

Night Shift - a six-week night photo essay Photographer and author · 35mm lens, black-and-white film, digital camera, manual white balance

Problem. My thesis asked whether a street has a personality when its people are gone, and how to show that honestly without staging anything.

Approach. I walked the same 400 metres of Kettle Lane every night from 2 AM to 4 AM for six weeks, with one 35mm lens, no flash and no tripod. After two weeks of orange film under sodium lamps I switched to digital at a fixed 2800K. I logged sounds and movements next to every frame.

Outcome. 2,100 exposures edited down to 48 frames, a written thesis in two chapters, and a finding I could prove from my own log: the street keeps a timetable - ovens at 3:10, bins at 3:40, a fox on 31 of 42 nights.

FREELANCE PITCH

I shot Night Shift, a six-week documentary series on one street between 2 AM and 4 AM: 48 frames edited from 2,100, all in available light. If you need a quiet, observant series about a place, a night shift or a team at work, I can plan it, shoot it and edit it down to the frames that matter.

Visuals to capture

[] Frame 07: first oven light through the bakery glass photo · ~3 min · LinkedIn, Instagram, TikTok / Reels / Shorts [frames/index.csv](#)

Export frame 07 from the final edit at 1080 px wide; crop to 4:5 for Instagram slide 3.

[] Frame 19: the fox near number 27 photo · ~4 min · Instagram, TikTok / Reels / Shorts [frames/index.csv](#)

Export frame 19; for TikTok, slow 4-second push-in (Ken Burns) in CapCut.

[] Clock-time sequence of the six frames in index.csv b-roll · ~10 min · TikTok / Reels / Shorts [frames/index.csv](#)

Put frames 01, 07, 12, 19, 33, 48 on a timeline, 3-5 s each, with the time from index.csv as on-screen text.

[] Ambient sound at 3 AM b-roll · ~5 min · TikTok / Reels / Shorts

Next walk, record 20 seconds of phone audio at the bakery corner at 3:10 AM; use it under the voiceover.

Prompts for image tools

INSTAGRAM · CANVA

4:5 portrait slide, near-black navy background, a single thin amber line like a sodium street lamp glow at the top, large white sans-serif headline 'What one street does at 3 AM', small amber time stamp '03:10' bottom left. Minimal, editorial, lots of empty space. No people, no logos.

LINKEDIN · CHATGPT IMAGE

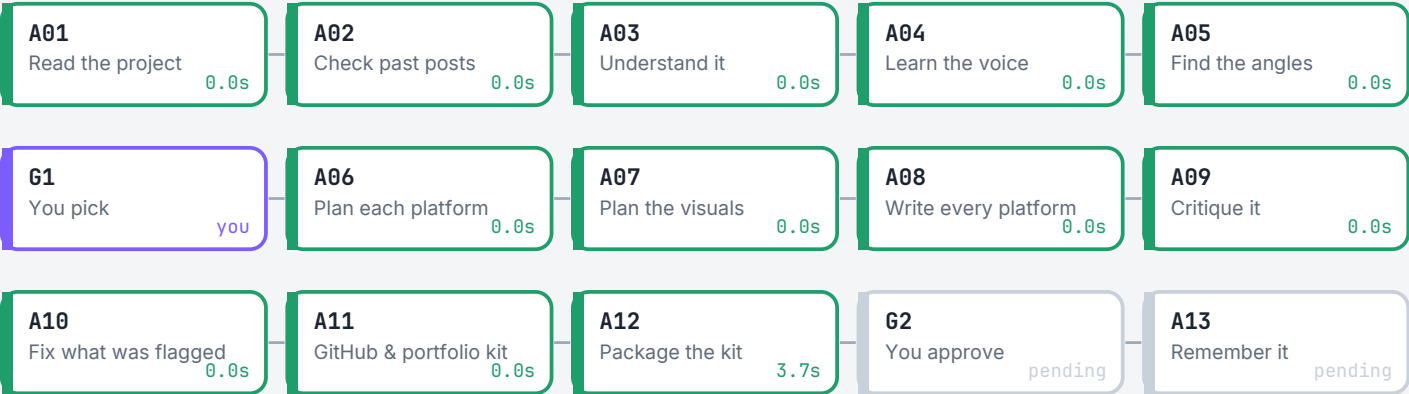

1200x627 photograph-style illustration of an empty terraced street at 3 AM lit by orange sodium lamps, a bakery window glowing warm on the right, a fox silhouette crossing in the distance, cinematic, quiet, no text, no people.

Evidence: every claim points at a real file
